

Strongbox is integrated with Moody's Analytics RiskCalc to include instant EDF calculations along with the power financial insights.

**Simple for customers**

A streamlined, easy-to-use borrower experience

**Industry-standard scoring**

Full financials + instant RiskCalc EDF

**Powerful for you**

Price risk more effectively with better data + automation

It's as simple as 1-2-3

## The Advantages Are Clear

- ✓ A simple, easy-to-use experience for your customers
- ✓ Instant financial and cash flow analysis + metrics
- ✓ Instant industry leading probability of default scoring (EDF)
- ✓ Flexible outputs: Ready-to-use financial workbooks (XLSX) or data via API into your existing systems

## Why RiskCalc™?

- ✓ Generates an Expected Default Frequency (or EDF) score using financial statement data
- ✓ This score is based on the world's largest and cleanest database of private firm financials and defaults (Moody's Credit Research Database)
- ✓ RiskCalc is an award-winning software known as the industry standard across business credit
